

Residency in Primary Eye Care
Womack Army Medical Center, Fort Bragg, NC
in Affiliation with
Northeastern State University of Oklahoma, College of Optometry
(NSUOCO)

Program Curriculum

The educational objectives, learning activities, and expected outcomes of the Residency in Primary Eye Care include the following:

1. Provision of optometric care to a minimum of 1,500 diverse patients at Womack Army Community Center and Northeastern State University Oklahoma College of Optometry campus clinics with emphasis in ocular disease, vision rehabilitation, and primary care.
2. Appropriate referral and co-management of patients with other health care providers. External rotations may be arranged if likely to enhance expertise in ocular disease, vision rehabilitation, and primary care.
3. Clinical supervision of optometry students.
4. Lecture and workshop presentations in the form of continuing education, grand rounds, optometry classroom, etc.
5. Participation in residency seminar activities, including literature review, journal club, clinical slide review, and case presentations.
6. Attendance of continuing education courses.
7. Completion of a research paper, literature review, or case report of publishable quality.
8. Active involvement in the optometric community through membership and participation in optometric organizations.
9. Extend experiences that are unique to the military optometrist, such as special trauma courses or opportunities to deliver eye care in an austere environment.
